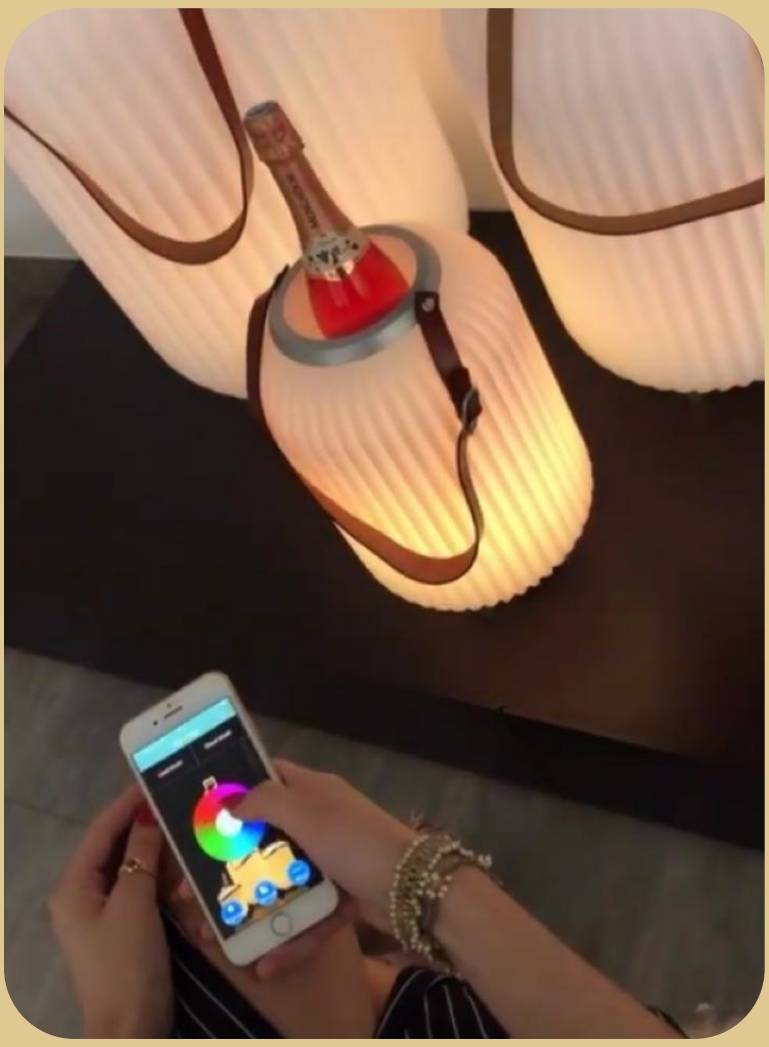
THE.LAMPIONS

MULTICOLOR LAMP, BLUETOOTH SPEAKER,
SMALL WINE COOLER ALL IN ONE!

Let the music play!

Wireless Bluetooth Speaker

All our lanterns come with a Bluetooth speaker. With this you can stream your favourite music and create even more atmospheric moments. To make it even easier, download our free app to control both the music and the light at the same time. So you don't need a separate remote control anymore, they just get lost.



For an extensive manual, we refer you to our FAQ and youtube channel.

We have provided the lanterns with metal legs, which allows the sound to escape. The box is placed at the bottom of the lantern. The lantern itself acts as a kind of resonance box so that the sound is very well rated by our customers. No, it is not a replacement for your sound system, of course. But that's not what it was designed for, is it? The bigger the lantern, the more power it has. 3W for The.Lampion XS, 5W for the S, 8 for the M and 10W for The.Lampion L. The great thing is that all the lanterns (and other products with a music function) can be easily linked together. So you can create the same sound and light in every corner!
