

THE.LAMPIONS

MULTICOLOR LAMP, BLUETOOTH SPEAKER,
SMALL WINE COOLER ALL IN ONE!

Light up your day!
Multicolor LED Lighting

Lighting is, of course, an essential part of a lantern. The combination of Bluetooth speaker, wine cooler and certainly the beautiful light is what makes our wine cooler so special and very popular! The many possibilities with regard to lighting are particularly appreciated. Would you like a lovely relaxing mode where the different colours quietly flow into each other, a disco version where the lighting moves to the beat of the music or would you rather choose one fixed colour? Everything is possible. Via our (free) app you choose the mode you want and switch to the colour you want. Bright white, red, green or purple and everything in between. And for more subtle lighting, simply choose warm white.
